Hunt's Early-Flowering and Forcing Bulbs

Convallaria majalis (Lily-of-the-Valley)

Lily-of-the-Valley

Retarded Forcing Crowns from Cold Storage

Hunt's Exhibition Strain

Our Lily-of-the-Valley pips are imported direct from one of Germany's finest raisers, and are unexcelled for their quality, extra-large bells, long, strong spikes, and handsome foliage. Especially selected for exhibition.

Extra-strong Berlin Pips, for forcing, from cold storage. \$9 per case (100 pips), \$18 per case (250 pips), \$70 per 1,000.

Early Roman Hyacinths

Bulbs planted in September will bloom in December.

	Doz.	100
White. Extra large. XXX.	\$3 00	\$18 00
White. Selected Bulbs. XX.	2 50	16 50

Prepared Dutch Hyacinths

These bulbs are only intended for indoor planting and have, both in growing and harvesting, been submitted to a treatment that insures early ripening and leaves them in a condition to respond to intense forcing methods for early bloom.

Freeseias

New-crop bulbs will be ready in July and if potted at once, can be bloomed early for Christmas.

Novelty Freeseias

ELDER'S GIANT WHITE. By far the largest white Freesia in existence; almost twice the size of Purity. Top-size bulbs, \$12.50 per 100, \$110 per 1,000.

AURORA. Yellow suffused orange. \$7 per 100, \$60 per 1,000.

MARIE FISCHER. (Fischer's.) Beautiful lavender-blue. \$10 per 100, \$90 per 1,000.

MRS. R. CRAIG. (Fischer's.) Uniform blue. \$11 per 100, \$100 per 1,000.

PINK BEAUTY. (Frey's.) This is a distinct new type of Freesia—a giant rose-pink with broad petals and flat, open flowers. It looks more like an orchid spray than a Freesia. Top-size bulbs, \$13.50 per 100, \$125 per 1,000.

SUNSET. Beautiful new flame-orange color. This variety was the greatest attraction in the field during flowering season. Top-size bulbs, \$14 per 100, \$130 per 1,000.

Purity Freeseias

PURITY. (Casad's.) Snowy white flowers of large size, borne in great profusion on upright, stiff stems 2 to 2½ feet long. Largest Bulbs. XXX...\$7 00 \$60 00

Second Size. XX..... 5 50 50 00

FISCHERI. Mammoth; pure white..... 8 00 75 00

GOLDEN DAFFODIL. The largest and best yellow Freesia. The large, deep yellow flowers are borne on long, strong stems. Largest bulbs.....12 00 110 00

GOLDEN TREASURE. Extremely large and graceful flowers. The golden yellow petals are lightly tinged with lavender. Strong, long stems. Very attractive and distinct. Largest bulbs.....12 00 110 00

California. A large flower of bright golden yellow; 100 1,000
extra fine, strong growth and long stems.....\$6 50 \$60 00

Schwaben. Light yellow with little red stripes on lower petals..... 6 00

Souvenir (Prim.). Purest golden yellow..... 7 00

War. Deep blood-red..... 7 00

White Wonder. Pure white..... 8 00

ASK FOR COMPLETE BULB CATALOGUE. READY JULY 1

Hunt's *Perfection* Strawberry Plants

STRAWBERRIES give the greatest yield and the largest berries when grown in rich soil; hence, no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal supply of well-rotted manure. At fruiting-time a top dressing of ground bone will be beneficial.

Strawberry plants should be set out in rows 2 feet apart and the plants a foot apart, cutting off all runners as they appear. The varieties we offer are all perfect flowering and therefore need no association with any other variety for perfect fruiting.

NOVELTY

Edmund Wilson

THE GIANT STRAWBERRY

Although, undoubtedly, this is the largest Strawberry in existence, none of the other qualities that go to make a fine Strawberry are lacking. The fruit is of exceptional quality, perhaps not so firm as some other varieties, but it is unexcelled for the home garden and home consumption. The blunt, heart-shaped berries are of very dark color throughout, extremely juicy, and of superb flavor, ripening in midseason. The plants are exceptionally large and vigorous. Pot-grown plants, \$1.50 per doz., \$10 per 100.

Save time and gain crops by starting your garden with

Hunt's Perfection Pot-Grown Strawberry Plants

By setting out pot-grown plants you practically eliminate the chance of losing plants, no matter how late they are set out or how dry the season. Our pot-grown Strawberry Plants are vigorous young specimens, grown in pots, and shipped with ample earth about the well-developed roots. Such plants take hold immediately, and a heavy crop is assured the following season.

Shipping season starts July 15 until October. We recommend as early planting as possible to enable the plants to get established before the advent of winter.

Late summer planting of Hunt's Superb Strawberry plants in heavily fertilized ground insures a good crop of fruit next spring

Hunt's Perfection Strawberry Plants

Kinds that Yield Most and Taste Best

STANDARD VARIETIES

Uniform prices for all sorts (excepting where otherwise quoted), \$1 per doz., \$7.50 per 100
\$70 per 1,000

Barrymore. The bluntly conical berries are of large size, beautiful, firm, meaty, and of rich and sugary quality. The color is dark crimson. Midseason to late.

Brandywine. Bears great quantities of large, bright crimson berries of good quality. Demands rich soil. Midseason.

Bushel Basket. A giant in both plant and fruit. Enormously prolific, and the fruit is of high quality. Winner of the Barry Gold Medal. Midseason. \$1.50 per doz., \$8.50 per 100, \$80 per 1,000.

Chesapeake. The berries are uniform in size and shape, mostly heart-shaped; color is bright crimson, flesh firm and of excellent quality. Midseason to late. \$1.50 per doz., \$8 per 100, \$75 per 1,000.

Charles I. Extra early, being one of the first varieties to ripen its fruit. A big cropper of evenly shaped, well-colored berries. \$1.50 per doz., \$8 per 100.

Delicious. A new medium to late variety, producing enormous crops of berries that are true to name, "Delicious." \$1.50 per doz., \$10 per 100.

Early Jersey Giant. The earliest variety, producing large fruit, and by far the best, extra-early variety. Of extra-high quality, very attractive and extremely productive. It is surely "the Strawberry without a fault." \$1.50 per doz., \$9.50 per 100, \$90 per 1,000.

Gandy. The texture is of the firmest and the color a bright flame. Of large size and is late to very late in ripening.

Glen Mary. The large, deep rich red, broadly conical berries are very attractive, bringing top prices until the end of the season.

Howard No. 17. One of the best of the second-early varieties. Very beautiful and of high quality.

Hundred Dollar. A splendid midseason variety. Produces very large, light scarlet berries, of high quality. Does well throughout the country in general.

Joe (Big Joe). A midseason to late variety, fully up to Chesapeake in size, firmness, and yield, and superior to it in flavor and color.

John H. Cook. Among second-early varieties there is no heavier cropper. In growth, constitution, and other worthwhile qualities we consider it one of the best of the many Van Fleet hybrids. \$1.75 per doz., \$12 per 100.

Judith. The large, well-flavored fruit maintains its size uniformly throughout the season. The dark red berries are large, pointed in shape, and of a deep red color throughout, to the core. \$1.50 per doz., \$8.50 per 100, \$80 per 1,000.

Marshall. Vigorous in growth, with clean healthy foliage; very productive under high culture. The beautiful large berries are of extremely good quality and meaty texture. Midseason.

Premier. Excelled by no early variety. Produces in vast quantities berries of good size, attractive appearance and excellent quality.

Royal Sovereign. A well-known English variety that is used here principally for forcing, but which does equally well outdoors. Distinct in habit, shape and flavor. Very heavy cropper. \$15 per 100.

Sharpless. A variety that fruits rather late in the season; produces handsome large berries of fine quality.

Stevens' Late Champion. It is one of the most prolific and valuable of the late varieties.

Success. All things considered, this is one of the best early varieties. Berries slightly oblong, with blunt end, bright scarlet or flame color, quite large, and uniform in size, color and shape.

William Belt. Its flesh is solid and deep crimson in color, and the blossoms are large, with abundance of pollen. It begins to ripen quite early and continues until almost the close of the season.

The Everbearing Strawberries

The Everbearing varieties of Strawberries, frequently termed "Fall-bearing," have decided merit. In addition to bearing a good crop in late summer and autumn, they also give a heavy crop of fruit as early as June. In order to be sure of a good fall crop, remove all blossoms from the plant as they appear from the first to the middle of July.

MASTODON. "The Wonderberry." This is truly the largest, most delicious and heaviest yielding of all Everbearing sorts. It outyields some of the finest June-bearing sorts during their season, and continues to produce throughout the summer and fall berries of amazing size and surpassing quality. \$3 per doz., \$18 per 100.

Champion. Produces dark crimson, smooth and sweet-flavored berries. One of the most prolific sorts. \$2 per doz., \$12 per 100.

Progressive. The berries are smooth and uniform in size, deep crimson in color, and of superb quality. \$1.75 per doz., \$10 per 100.

SPECIAL OFFER: To encourage the planting of Everbearing Strawberries, we will send one dozen each of \$6.00 the above three varieties, all pot-grown, for

Everbearing Strawberries

Delicious Small Fruits for Your Garden

Grapes

Agawam. Large loose bunch; berries deep red, almost maroon, large, meaty with rich aromatic flavor. Strong two-year plants, \$1 each, \$9 per doz.

Caco. The highest in quality of all hardy Grapes. Strong, vigorous grower, healthy and prolific. A great yielder of delicious fruit, clusters of fair size, individual berries firm, full of delicious flesh and juice; of attractive red and amber color overlaid with a beautiful bloom. Two-year plants, \$1.50 each, \$12 per doz.

Campbell's Early. An early-ripening black Grape that produces large bunches of superb fruit. Two-year plants, \$1 each, \$9 per doz.

Catawba. Standard red Grape. Vigorous, hardy, and productive. Clusters large, long, and broad; berries of medium size. Two-year plants, \$1 each, \$8.50 per doz.

Concord. Best-known and most popular variety. Succeeds almost everywhere. Large black berries are borne in large bunches. Two-year plants, \$1 each, \$8.50 per doz.

Niagara. Popular white variety. Cluster large and compact. Ripens in midseason with Concord. Two-year plants, \$1 each, \$8.50 per doz.

Currants. *The Ideal Fruit for Jellies.*

A cool, moist location is best for these fruits. They succeed admirably when planted by a stone wall or fence. Keep the ground mellow and free from weeds and grass, using fertilizer plentifully as Currants are heavy feeders.

Fay's Prolific. Bunch and berry large, bright red, and sparkling. A regular and prolific bearer. Two-year plants, \$5 per doz.

President Wilder. Produces, late in the season, very large, bright red berries that are juicy and of high quality. Two-year plants, \$5 per doz.

Red Cross. This is reputed to be the sweetest of all Currants. It is an exceptionally healthy and vigorous grower. Produces immense crops of good-sized sparkling red berries in large clusters. Two-year plants, \$5 per doz.

Red Cross Currants

Downing Gooseberries

Gooseberries

The Berry for Good Pies

Gooseberries may be grown in America just as easily as in Europe, where almost every cottage garden has its planting of Gooseberry bushes. The soil should be well enriched and the plants should be given ordinary garden culture. When established a slight annual thinning of the old wood will benefit them.

Oregon Champion. Distinct from all others. The plant is of a rather slender growth and is not a very strong grower, but it produces berries that are pale amber when fully ripe and of excellent quality for dessert or cooking and of good size. Two-year plants, \$9 per doz.

Carrie. This is a very strong grower and highly productive. When ripe it is maroon in color and of good quality, though the berries are rather small. Two-year plants, \$9 per doz.

Downing. Perhaps the most popular variety. Has been long and favorably known for its dependability and abundant bearing. The berries are pale green and of large size and good quality. Two-year plants, \$9 per doz.

Raspberries

St. Regis. A well-known everbearing variety that will produce berries of good quality for four months. Heavy fruiting plants, \$3.50 per doz., \$17.50 per 100.

La France. The best everbearing Raspberry grown. Is extremely hardy, reaches a height of 9 feet, and the berries are deep pink, juicy, and of delicious flavor. The fully developed fruits are twice the size of the average Raspberry. Extra-selected plants, \$7 per doz., \$45 per 100.

Latham. A splendid strong-growing variety that produces immense quantities of bright red, extra-large berries during the latter part of June and well into July. Extra-strong transplanted plants, \$3.50 per doz., \$17.50 per 100.

Cuthbert. Berries are large size, deep crimson, firm, and of high quality, being rich and spicy. Ripens in mid-season until late. Strong plants, \$3 per doz., \$15 per 100.

White Queen. Bears an abundance of almost white fruits from August until well into November. The large, firm berries are free of seeds and acid; of exquisite flavor and aroma. Plants attain a height of 6 feet. \$6 per doz., \$40 per 100.

Black Raspberries

Kansas Blackcaps. The canes are of strong growth, hardy, and prolific. Berries are of large size, jet-black, firm, and sweet. Ripens early to midseason, and matures its entire crop very quickly. Strong plants, \$3 per doz., \$15 per 100.

Strawberry-Raspberry

A splendid large novelty berry, of true everbearing type. The fruit needs cooking to develop its flavor, when it becomes delicious. Heavy plants, \$8 per 100.

Blackberries

There are, indeed, few greater delights than to be able to go into one's garden and pick big, shiny beauties by the handful, to be converted into delicious jams, jellies, and pies, or served, just as they are, for breakfast or as dessert. In field-culture, plant in rows from 5 to 7 feet apart (according to the vigor of the variety) and 3 feet apart in the rows. In the garden, plant in rows 5 feet apart and the plants 3 feet apart in the rows.

Eldorado. Very popular, on account of its extreme hardiness and vigor. Berries are medium size, jet-black, and very sweet. Fruits early to midseason. Transplanted canes, \$2 per doz., \$12 per 100.

Taylor. A most profitable late variety. Clean, healthy foliage with berries of good size and very productive. Transplanted plants, \$1.50 per doz., \$10 per 100.

Ward. The canes are of strong growth, quite hardy, and yield a heavy crop of large, handsome berries. Transplanted plants, \$2 per doz., \$12 per 100.

Dewberries

These fine dwarf Blackberries are in excellent demand especially by the gardener with small area.

Austin's Improved. \$5 per doz., \$37.50 per 100.

Lucretia. \$5.50 per doz., \$40 per 100.

Japanese Wineberry

A novelty, with attractive fruits useful for dessert, canning, and wine-making. Sells easily and well. Heavy plants, \$3 per doz., \$20 per 100.

Loganberries

This is rather a unique fruit, being a cross between the raspberry and blackberry yet it is distinct from either. The flavor is delicious, differing from any other fruit and pleases everybody as a dessert. It ripens about the end of the strawberry season and in advance of all but the earliest raspberries, therefore it comes into use at the time when it is most appreciated. Extra-heavy fruiting plants, \$7 per doz., \$45 per 100.

Blueberries

There is a great deal of difference between the common Blueberry and the cultivated varieties. The luscious berries of the improved sorts average $\frac{1}{2}$ inch in diameter and have seeds so small as to be almost unnoticeable. Keep up the acidity of the soil by heavy mulches of freshly fallen leaves each year, and supply plant-food by the addition of well-rotted leaves. Strong nursery-grown plants, Mixed kinds, \$2.50 each, \$25 per doz.
